### **OBJECTIVE**

Passionate and self-motivated about app development. While keeping up with college courses, I taught myself iOS development (Swift). I strongly believe that if you have passion and motivation, you can achieve anything, and I am willing to incorporate this mindset into a team, working and inspiring each other to work hard and to reach goals. A single app has the potential to reach and affect millions of lives, I want to be part of a team that is willing to make a difference in this world.
